Tools and Comments Report

POSITION PLAYER			Report #: _____ Instructor: _____
Player: <u>Javier Rivas</u> Team Name: <u>Altoona Curve</u> Date of Birth: <u>09/02/02</u>	Pos: <u>IF</u> Bats: <u>R</u> Throws: <u>R</u> Height: <u>6'5"</u> Weight: <u>226</u>	School: <u>International</u> Class: <u>2019</u> Elig Yr: <u>2019</u> Games: <u>4</u> Innings: <u>36</u>	Type: _____ OFP: _____ Report Date: <u>08/27/26</u> Scout: <u>Will Dolan</u>
Hit Type: <u>Pull</u>			
Stance/Hit Approach:		Tall, open stance. Slight bend in knees, hands held at shoulder height and bat is vertical at start. Quick circular rotations with bat. Front foot comes in to start load with lean back and the body crunches down. Almost leaps out of stance before contact. Normal finish with one hand.	
Physical Description:		Above average height but moves well. Athletic mover. Room for physical improvement in lower and upper half, but height and athleticism make up	
		ML Comparison: _____	

Category	Present	Future	Comments
Hitting Ability *	30	40	Free swinger, lots S&M with damage approach. Hits LHP better than RHP. Inconsistent contact, needs improved contact for better grade.
Plate Discipline	25	40	Poor decisions, does swing IZ but also out. Struggles with pitches on outer half and up. 46% chase percentage with -17 decision score
Power Frequency *	35	40	Great bat speed. Can do a lot of damage to the pull side. Inconsistent contact and decisions seem to have lead to shortage in HR.
Raw Power	70	70	Easy pull side power. Can do damage to all sides but mainly pull side. Posted multiple balls in BP 105+.
Running Speed *	30	30	Not a good runner. 18th% in running speed. 3/5 in SB. Can go base to base but not a steal threat.
Base Running	30	30	Can go base to base. More of a station to station guy. Finding ways to use legs in non SB sense would help grade.
Arm Strength *	70	70	Great arm, in the 87th % at 90.7 mph this season. Arm plays better at 3B than SS. Long arms and athleticism allow for velo.
Arm Accuracy	50	60	Arm is mostly. When plays make him off balance, can see some throws start to leak off target, especially going to his left side.
Fielding *	50	50	7 E in 2026. Almost all at third base. At SS/2B he can make most/all plays. Struggles at 3B at balls hit w velo or to his backhand. Improvements at 3B would help fielding grade.
Range	45	50	Can get to balls well at SS/2B, especially to glove side. At third base struggles at get to balls AS or GS. Will be more consistent if he can get to more balls at 3B
Baseball Instincts	40	40	Needs improvement on swing decisions, non base stealer, area for improvement in that area. Can take command in infield when at SS.
Aggressiveness	50	55	Very aggressive swinger at the plate. Looking to do damage at all times. More refined approach with same level of aggressiveness would help Rivas

Summation: Rivas is a 6'5" MIF/3B out of Venezuela with good tools (70 Arm, 70 Power) but a concerning plate discipline issue. He's a free swinger who chases at everything, generating elite bat speed when he connects but inconsistent contact limits his power (9 HR this season). Slower than average runner and a non threat on the bases. Despite defensive concerns and poor 3B transition this season, his arm and frame project best at the position long term if he can improve his range and exit velo handling. Unless swing and miss improves, he's a pass at the moment. PG: 40 FG: 45
