

Diversity Pipeline Scout Development Program Tools and Comments Report

POSITION PLAYER

Report #:

Instructor:

Player: Jace Bohrofen Pos: OF School: Arkansas Type: _____
 Team Name: New Hampshire Fisher Cats (AA) Bats: L Class: 2023
 Date of Birth: 10/19/01 Throws: L Elig Yr: 2023 OFP: _____
 Height: 6-01 Games: 24 G
 Weight: 205 Innings: _____
 Hit Type: Pull Report Date: 05/04/26
 Scout: Will Dolan

Stance/Hit Approach: Taller stance, open stance, upright with slight knee bend, hands around shoulder height with near vertical bat, front foot turned in, shoulders level, bat waggle in circular motion

Physical Description: Strong, physical lower half, baseball build, good posterior chain

ML Comparison: _____

Category	Present	Future	Comments
Hitting Ability *	45	50	Low bat to ball ability, lots of swing and miss in the swing, pull approach, groundballs to RS, (46% GB%), oppo is more of an accident than approach
Plate Discipline	30	40	High swing and miss, high chase vs LHP, minimal chase vs RHP, misses or fouls pitches in zone, high BB chase, bad swing decisions late in count
Power Frequency *	55	60	7HR through 24 games, high power potential, miss hit oppo homer in game, damage primarily to CF/Pull, tendency to spin off and hurt ball flight
Raw Power	60	60	High potential to pull side, flashes oppo power, high EV rates across all pitches, 60 grade when squared up but tendency to spin off can effect flight
Running Speed *	60	60	Above average speed (75th percentile), top speed 29.9 per org database
Base Running	50	55	5/6 SB, below average lead length at 1st and 2nd, potential to be a base stealer but not one yet, can take the extra base, missed a ball in dirt read
Arm Strength *	55	55	Average to above average arm strength (87.8 MPH), 60th percentile per org database
Arm Accuracy	50	50	Average accuracy, better throwing to 2nd than 3rd, didn't need an extra shuffle on throws, accurate from different arm angles
Fielding *	50	55	Currently slow jumps on BIP, but with reps and experience, projects to improve reads and first step
Range	45	50	Average range, slow first step hinders range
Baseball Instincts	45	50	Average instincts on bases, can take the extra base, pre pitch reads may hinder his range and jumps
Aggressiveness	50	55	Gets his swings off, damage approach, potential to be a base stealer

Summation: Bohrofen projects as a low average/high power bat with the potential for the bat to ball ability to improve with decreased swing and miss. His plate decisions show IZ miss, high chase and high swing and miss. Being 24-25 in AA may limit upside. The defense projects as average, and he projects as a platoon corner outfield bat right now. His tendency to spin off on balls shows in his spray with lots of GB to the right side, with a mechanical adjustment he projects much better. Bohrofen projects as a platoon bat with the potential to be a fourth outfielder. PG: 50 FG: 55
