

Diversity Pipeline Scout Development Program Tools and Comments Report

PITCHER				Report #:	
				Instructor:	Will Dolan
Player:	<u>Joe Miller</u>	Pos:	<u>SP</u>	School:	<u>Penn</u>
Team Name:	<u>Erie Seawolves (Tigers)</u>	Bats:	<u>L</u>	Class:	<u>2022</u>
Date of Birth:	<u>3/13/2000</u>	Throws:	<u>L</u>	Elig Yr:	<u>2022</u>
Wind-Up:	<u>SET</u>	Height:	<u>5'10"</u>	Games:	<u>2</u>
Arm Angle:	<u>H3/4</u>	Weight:	<u>195</u>	Innings:	<u>6.1</u>
Arm Action:	<u>Good</u>	Report Date: <u>4/27/2026</u>			
Delivery:	<u>Good</u>	Scout: <u>Will Dolan</u>			
Arm/Delivery Mechanics:	Hands start close to body at chest height, bring up with leg lift, slight turn in, throws across body from a H 3/4 slot, sinks into back leg slightly, stays taller through leg lift, falls slightly off glove side in finish				
Physical Description:	Smaller stature, average physical build, room to improve			ML Comparison:	<u>Brant Hurter</u>

Category	Present	Future	Velocity	Comments
Fastball *	50	50	91-94	GB pitcher. Relies on HZ FB movement (AS run). Works in/out both sides of plate. Can elevate for S&M but primarily contact P.
FB Movement	45	50	91-94	Inconsistent ride, when it's on it projects well but often flattens, allows for up/down pitching, tendency to miss arm side on 4S and 2S
Curve *	n/a	n/a	n/a	
Slider *	50	55	79-85	2 sliders, faster/shorter & slower/bigger, sweeper one plays better against LHH, especially down, in to RHH, front door to LHH
Sinker *	45	50	90-92	SNK plays well to LHH (weak contact), but RHH handle it better. More 2seam than SNK, Improved sink would make it average-above
Change	45	50	80-84	CH is inconsistent, when down produces S&M vs RHH, but often floats middle and gets hit hard, inconsistent
Command	40	50		FB misses away to RHH, AS to LHH, leaves pitches middle. SL miss down or GS. Occasional big misses off plate. CH can float.
Control	30	50		14.4% BB in limited 2026 looks (17.2 IP), but has shown 50-grade control in 2024-2025 sample, project 50 if mechanics stabilize
Baseball Instincts	45	45		Doesn't hold runners well, fields position well,
Aggressiveness	50	50		Nit picks corners, will work backwards in sequencing (breaking ball first). Lacks aggressiveness attacking hitters.
Summation: Projects as an organizational bulk relief option if control issues in limited 2026 sample stabilize to 2024-2025 numbers. At 25-26 years old in AA, age limits his upside. With mechanical consistency to tighten release point, develop a dephy SNK, and improved CH, theres a potential for value as a LHP bullpen arm. If the org lacks LHP bullpen options, Miller could fill a need, but with current numbers he doesn't project as a viable option at this point. PG: 45 FG: 50
