

Diversity Pipeline Scout Development Program

Tools and Comments Report

POSITION PLAYER				Report #: Instructor:
Player: <u>Jonah Cox</u>		Pos: <u>OF</u>	School: <u>Oral Roberts</u>	Type: _____
Team Name: <u>Richmond Flying Squirrels (SFG)</u>		Bats: <u>R</u>	Class: <u>2023</u>	
Date of Birth: <u>08/04/01</u>		Throws: <u>R</u>	Elig Yr: <u>2023</u>	OFP: _____
		Height: <u>6'2"</u>	Games: <u>42</u>	_____
		Weight: <u>204</u>	Innings: <u>54</u>	
Hit Type: <u>Opposite</u>		Report Date: <u>05/28/26</u>		
		Scout: <u>Will Dolan</u>		
Stance/Hit Approach:		Upright stance, slight bend in knees, hands below shoulders, bat held loose with barrel pointed toward umpire. More of a leg swing than kick, brings knees together, hands don't move much in load. Middle of the field approach.		
Physical Description:		Athletic frame, average physically but explosive, room for filling out		
		ML Comparison: <u>Jarren Duran</u>		

Category	Present	Future	Comments
Hitting Ability *	60	60	Elite hit tool already at ceiling. Expect regression at higher level. Legitimate hitter, but elite BA reflects AA enviornment, not true contact ceiling
Plate Discipline	55	60	Good decisions, doesn't chase and swings at good pitches, will foul off pitches out of zone, harms his ability to take his walks with his speed
Power Frequency *	60	60	High damage/HR, almost all pullside HR, 91st percentile xDamage, impact angle allows for good ball flight, low EV may hinder future product
Raw Power	55	60	55-grade raw power with elite mecanics/impact angle translating to 60-grade power frequency. Could unlock more gains with added strength.
Running Speed *	80	80	Incredible speed, compares to Chandler Simpson, 96th percentile in top speed (org database), free and easy movements, 31.2 top speed
Base Running	60	70	26 SB in 33 attempts through 42 games, looking to steal every time, can steal 2b and 3b, can always take the extra base, CS 7 times
Arm Strength *	40	45	Below average arm strength. Doesn't pose defensive threat. 83 mph average per org database. 36th percentile. Could add velo with strength
Arm Accuracy	50	55	Hits cut off man consistently, can get the ball in quickly and consistently, doesn't sail throws, misses low rather than high
Fielding *	55	60	Speed allows him to get to fringe balls, fast exchange in outfield, will steal outs, arm strength holds him back from being a complete profile
Range	60	70	Occasional poor jumps, can make up with speed, occassional non optimal route, better jump will make him have elite range
Baseball Instincts	55	60	Above average instincts. Aggressive on bases. 26/33 SB shows strong reads on pitchers. Executes bunts well. Will steal on poor counts.
Aggressiveness	55	60	Very aggressive on base paths, can be a free swinger with two strikes even if the pitch is a ball, despite power, will default to bunt

Summation: Cox's elite production (.407 BA, 12 HR in 42 games) at this level represents likely represent his ceiling rather than floor, as regression should be expected at the higher levels. Questions remain why he hasn't been promoted to AAA give production, suggesting org depth concerns or recent breakout status. Cox projects as a backup OF, pinch runner with speed and contact value. Sub-40 grade arm eliminates CF and limits RF value. Expected timeline would be 1-2 years. Future Value: 45-50
