STRUCTURE

- Control years (1–5): $\$1 + \$2 + \$5 + \$9 + \$10 = \27M
- Does not beat the \$27.5M arb prediction
- With \$10M bonus, control cash is \$37M (+\$9.5M)
- FA years (6–7): $\$14.5\text{M} + \$15.5\text{M} = \$30\text{M}$
- Performance Incentive: 2 Top-15 MVP finishes in Y1-5? +\$2.5M per FA year
- Combined with the control years premium we paid, Sal needs to post ~4 WAR in FA years 1 + 2 to breakeven
- C1 / C2 club options: \$22M + \$24M, \$3M buyout
- \$70M guaranteed · \$118M max

Contract Summary

- He wins in arbitration years (+\$10M)
- We need ~4 WAR over his FA years to breakeven, over that is surplus value for the club
- Our internal projections have him at 3.7 WAR in 2032-2033
- Free agent again at 32 if both options are picked up; 30 if declined
